

AUNG KHANT ZIN

Frontend & Full-Stack Software Engineer

+65 8146 2766 · aungkhantzin1364@gmail.com · [GitHub](#) · [Portfolio](#) · Singapore (S Pass eligible)

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with nearly a year of production internship experience at ArcLab (Singapore EdTech). Shipped an AI-powered file-to-learning-content feature, built reusable React component libraries adopted across 4+ product modules, and delivered data-driven dashboards using React, Node.js, and PostgreSQL. Comfortable owning features end-to-end — from Figma to deployed production build.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Java

Frontend: React.js, Responsive Design, Accessibility (WCAG), Bootstrap, Figma

Backend & DB: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB

Tools: Git, GitHub, Vercel, Render, VS Code

Concepts: JWT Auth, State Management, Performance Optimization, API Integration, CI/CD basics

EXPERIENCE

Software Engineering Intern | [ArcLab](#) · Singapore

Apr 2025 – Feb 2026

EdTech SaaS platform for mobile-first workforce learning (concurrent with final semester)

- ▶ Architected and shipped an AI-powered feature converting uploaded files into structured learning content with auto-generated quizzes, directly increasing learner engagement metrics.
- ▶ Built a reusable React component library adopted across 4+ product modules, cutting duplicated UI code by ~30% and accelerating feature delivery velocity.
- ▶ Integrated REST APIs to replace static content with live, real-time data rendering — measurably improving interface responsiveness.
- ▶ Eliminated unnecessary re-renders through targeted memoization and rendering optimizations, reducing client-side processing overhead.
- ▶ Applied semantic HTML and WCAG accessibility best practices across components, improving keyboard navigation and screen reader compatibility.
- ▶ Deployed full-stack applications to Render and Vercel end-to-end, managing environment config and validating production builds independently.

PROJECTS

CashflowX — Personal Finance Tracker

cashflowx-app.onrender.com

Stack: React, Node.js, Express, PostgreSQL

- ▶ Built a full-stack finance app with JWT authentication, session-protected routes, and complete CRUD transaction management — handling real user auth flows securely.
- ▶ Designed RESTful APIs backed by PostgreSQL for persistent relational storage, and implemented an interactive dashboard with real-time spending visualizations.

RepoRadar — GitHub Repository Dashboard

repo-radar-sand.vercel.app

Stack: React, JavaScript, GitHub REST API, CSS

- ▶ Built a GitHub analytics dashboard surfacing repository metrics and issue tracking with search, filtering, and real-time rendering for fast repository exploration.

SaaS Landing Page

saas-landing-page-self-eight.vercel.app

Stack: HTML, CSS, JavaScript, Figma

- Designed and developed a fully responsive, accessible marketing landing page — from Figma wireframe through deployment — with strong UI/UX focus and cross-device compatibility.

Figma Restaurant Suite — UI/UX Design

[View Design](#)

Stack: *Figma*

- Produced wireframes and high-fidelity interactive prototypes for a restaurant booking and loyalty system, applying modern UX patterns and usability principles throughout.

EDUCATION

Diploma in Information Technology (Software Engineering) | [Singapore Polytechnic](#) · SingaporeApr 2023 – May 2026

Graduated: May 2026

CERTIFICATIONS

- CITI Program — Responsible Conduct of Research, Information Privacy & Security, Human Subjects Research
