

AUNG KHANT ZIN

Software Engineer — Frontend & Full Stack

+65 8146 2766 · aungkchantzin1364@gmail.com · [Portfolio](#) · [GitHub](#) · Singapore

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with hands-on internship experience building production-grade React applications and full-stack systems. Delivered an AI-powered content generation feature, reusable component libraries, and data-driven dashboards using React, Node.js, and PostgreSQL. Committed to clean, accessible UI, performance optimization, and scalable architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Java

Frontend: React.js, Responsive Design, Accessibility (WCAG), Bootstrap

Backend & Database: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Figma, Vercel, Render, VS Code

Core Concepts: API Integration, Authentication & Session Management, State Management, Performance Optimization

EXPERIENCE

Software Engineering Intern | ArcLab, Singapore

Apr 2025 – Feb 2026

- Engineered reusable React component systems adopted across multiple product modules, reducing duplicated UI code and accelerating team development velocity.
- Architected and shipped an AI-powered feature that converts uploaded files into structured learning content with auto-generated quizzes, directly increasing learner engagement.
- Integrated REST APIs to enable real-time data fetching and dynamic UI rendering, replacing static content with live, responsive interfaces.
- Optimized frontend rendering logic by eliminating unnecessary re-renders, improving page responsiveness and reducing client-side processing overhead.
- Applied semantic HTML and WCAG accessibility best practices across components, improving keyboard navigation and screen reader compatibility.
- Deployed full-stack applications to Render and Vercel, managing environment configuration and validating production builds end-to-end.

Part-Time Service Crew | Peppermint Restaurant, Singapore

Jun 2024 – Apr 2026

- Delivered consistent, high-quality customer service during high-volume service periods in a fast-paced hospitality environment.
- Resolved guest issues promptly and professionally, maintaining positive customer experiences under pressure.
- Collaborated with front-of-house and kitchen teams to ensure seamless daily operations and service readiness.

Part-Time Service Crew | RISE Restaurant, Marina Bay Sands, Singapore

Apr 2023 – Apr 2024

- Supported team operations during peak service in a high-standard luxury hospitality environment.
- Managed multiple concurrent responsibilities with attention to detail, coordinating table turnover to optimize guest seating flow.

PROJECTS

CashflowX — Personal Finance Tracker (Full-Stack)

Live: [cashflowx-app.onrender.com](#)

- Designed and built a full-stack finance tracking application featuring JWT authentication, session-protected routes, and complete transaction management.
- Developed RESTful APIs backed by a PostgreSQL database, enabling persistent, relational storage of user financial data.

- Implemented an interactive dashboard with real-time data updates and visual spending insights, enhancing usability and decision-making.

Tech Stack: *React, Node.js, Express, PostgreSQL*

RepoRadar — GitHub Repository Dashboard

Live: repo-radar-sand.vercel.app

- Built a GitHub analytics dashboard using the GitHub REST API to surface repository metrics and issue tracking in a clean, filterable UI.
- Implemented search, filtering, and real-time data rendering to enable fast, intuitive repository exploration.

Tech Stack: *React, JavaScript, REST APIs, CSS*

SaaS Landing Page

Live: saas-landing-page-self-eight.vercel.app

- Designed and developed a fully responsive marketing landing page with a strong UI/UX focus, ensuring cross-device compatibility and accessibility compliance.

Tech Stack: *HTML, CSS, JavaScript, Figma*

Figma Restaurant Suite — UI/UX Design

Figma: [View Design](#)

- Produced wireframes and high-fidelity interactive prototypes for a restaurant booking and loyalty system, applying modern UX patterns and usability principles throughout.

Tech Stack: *Figma*

EDUCATION

Diploma in Information Technology (Software Engineering) | Singapore Polytechnic, Singapore Apr 2023 – May 2026

Graduated: May 2026

CERTIFICATIONS

- CITI Program — Responsible Conduct of Research, Information Privacy & Security, Human Subjects Research

To Whom It May Concern

Eligibility for S Pass

AUNG KHANT ZIN (MXXXX587Q) has graduated from Singapore Polytechnic and has a Ministry of Education (MOE) bond obligation to serve in Singapore.

This letter serves to inform you that the Singapore Government will exercise flexibility in the assessment of the S Pass application of AUNG KHANT ZIN. You should also use the Self-Assessment Tool on the Ministry of Manpower's website for an indicative assessment on whether the applicant qualifies for an S Pass. If your company finds this graduate suitable for a position and makes an S Pass application to the Ministry of Manpower (MOM), the necessary work pass arrangements will be facilitated after receiving your submitted application. This is subject to the qualifying notes overleaf (as attached), which includes complying with the Fair Consideration Framework.

This letter is supported by the Ministry of Manpower and is valid for 12 months from the date of graduation or date of issue, whichever is later.

You may email Singapore Polytechnic at contactus@sp.edu.sg for clarifications.

Thank you.

Yours sincerely

Qualifying notes:

1. The applicant named overleaf is eligible to apply for an S Pass if he/she:
 - (a) secures full-time employment in a company of good standing in Singapore;
 - (b) submits an application for S Pass together with certified copies of educational certificates;
 - (c) is not on Government agencies' adverse record.
2. The employing company should ensure it has available mainstream quota and sub- quota to hire the applicant.
3. Professionals such as nurses, therapists etc. have to register with the relevant professional regulatory body before they are allowed to practise their profession in Singapore. Those who intend to practise their profession would have to seek registration before the S Pass is issued.
